

Grégoire Chailleux

Consultant

Grégoire Chailleux is an engineer graduate from TELECOM ParisTech, the leading school in France in the field of information technologies. He also holds a Masters Degree in information and communication sciences from CELSA - graduate school within the University of Paris Sorbonne, a school of reference in the information and communication sciences.

His distinctive experience in the field of new media is a real asset for innovative and often complex cultural projects, to which he brings his technical expertise added to a profound understanding of the users' needs in terms of contents, interfaces and devices implemented.

With a real passion for the issues raised by the integration of the digital dimension to the cultural sector and the means of accessing unique contents, Grégoire operates as a consultant and project manager in cultural mediation. He notably participated in the realization of the Digital Master Plan for the Louis Vuitton foundation (Fondation Louis Vuitton pour la Création). Beforehand, he worked as a consultant in information systems and multimedia engineer. He is knowledgeable in conceiving and implementing tailored multimedia systems and professional software for cultural institutions and their publics.

Furthermore, Grégoire benefits from an extensive project management experience in various fields: coordination of projects on the new social practices linked to Information and Communication Technologies for the French public sector, conception and project development of a web application dedicated to professionals of the cinema sector (Festival Scope), project management and development of Rich Internet Applications, etc.

Finally, Grégoire practiced as a teacher for primary school children, which allows him to be a valuable resource in developing pedagogical content for the projects on which he works.
