

BARRY LORD

Co-President

Barry Lord is internationally known as one of the world's leading museum planners. Dedicated, thorough and knowledgeable, having begun his museum career at the National Gallery of Canada while still an undergraduate, Barry brings over 50 years of experience in the management and planning of museums, galleries and historic sites to the hundreds of projects he has directed. Educated at McMaster and Harvard Universities in Philosophy and the History and Philosophy of Religion, Barry has planned and managed cultural and heritage projects that range from marine archaeology to industrial technology and from heritage villages to the complex stories of a nation. His profound knowledge of planning for art museums stems from his early work as an art curator, critic and educator. He has held positions as curator, education officer and director at several art galleries and museums in Canada and has curated freelance exhibitions for Canadian and American galleries.

As an author and editor, Barry was originally known for *artscanada* magazine (1967), and for *The History of Painting in Canada: Toward a People's Art* (1974), as well as numerous exhibition catalogues, art magazine articles and newspaper art criticism. More recently, together with Gail Lord, Barry edited and wrote the world's first book on the subject, *Planning Our Museums* (Ottawa, 1983), and what is now considered the guide book in the profession, *The Manual of Museum Planning*, which appeared originally in 1991 but has been so universally popular that it is now in its 3rd edition, AltaMira Press, 2012 (co-edited with Gail Dexter Lord and Lindsay Martin). *The Manual of Museum Management* (TSO, London, 1997; 2nd edition, AltaMira Press, 2009) followed, co-authored by Gail and Barry Lord. *The Manual of Museum Exhibitions* originally appeared in 2002, but again has been so widely used by designers, teachers and students that it is now in its 2nd edition (AltaMira Press, 2014), co-edited by Barry and Maria Piacente. Barry was one of the three authors of *The Cost of Collecting* (TSO, London, 1989), a landmark study in collection management costs, and both wrote and edited *The Manual of Museum Learning* (2007), published also by AltaMira Press. In 2010 Gail and Barry collaborated to write *Artists, Patrons, and the Public: Why Culture Changes* (AltaMira Press, 2010). Barry's most recent book is *Art & Energy*, published by The AAM Press of The American Alliance of Museums and distributed by the University of Chicago Press. Many of these books are being successfully used in university museum studies, cultural studies or exhibition design programs.

Barry's international reputation as President of Lord Cultural Resources, which he and Gail founded in 1981, is reflected by his many invitations to speak at conferences and seminars from Seoul to Zagreb, at the 2008 and 2012 Vienna Artweeks and at the 2013 International Conference on Sustainable Heritage Preservation at Roma 3 University in Rome. Having previously lectured in art history in both English and French at leading Canadian universities, he now teaches frequently in museum management, planning and training programs at universities and museum organizations around the world.

Barry often directs Lord Cultural Resources' Functional Briefs or Programs and our related Facility Strategies for museums, having developed a unique approach to zoning museum spaces and a comprehensive, systematic approach to space planning and functional requirements for museums. He has also directed hundreds of master plans, feasibility studies, collection analyses and exhibition planning, design and installation projects for museums around the world.

Planning Projects that are Built and Opened

Barry directed the planning of the following new museums or expansions that have successfully opened in recent years:

- Buddha Smriti Park Museum, Patna, India, Concept Plan, Facility Planning, opened in 2013
