

SEAN STANWICK

Director, Facilities Planning

Sean is an experienced facilities planner and programmer with over 20 years of experience in the field. Sean's ultimate goal is to create inspiring places and experiences that advance clients' cultural, interpretive and business goals. He is adept at synthesizing and communicating large amounts of complex input gathered during the planning process for use by decision makers. His capacity to facilitate and organize the contribution of diverse client and consultant team members enables timely evaluation of issues and options.

As a Director, Facilities Planning Sean contributes to collections, exhibit and facilities planning and programming projects for cultural institutions world-wide, bringing a unique understanding of the needs of all users from collections to staff and visitors. He is the author of over 30 space programs and strategic facility master plans for complex institutional projects including museums, galleries, and educational facilities, involving new buildings, renovations, and campus reorganization plans.

Facilitating the Client relationship through a collaborative planning process, Sean's core strengths include:

- Ability to develop long-range, strategic master planning solutions and conceptual facility plans that lift the human spirit
- Experience quantifying space programming needs and functional requirements
- Effective ability to succinctly communicate key ideas to non-design based stakeholders
- A commitment to ensuring his clients and end-users alike achieve a culture of "active believe-in" versus "passive buy-in"

Significant cultural and museum projects which Sean has played key management and planning roles include the Institute and Museum for California Art (U.C Irvine), the Raclin Murphy Museum of Art (University of Notre Dame), the Hoover Institution Library and Archives (Stanford University), the Muscarelle Museum of Art (College of William and Mary) the Tennessee State Museum (Nashville), and the Smithsonian Suitland Collection Storage Facility (Washington).

Sean is a graduate of the School of Architecture at University of Toronto and the Masters of Environmental Design program at University of Calgary.
